

Project Delivery

Structured delivery from first brief to handover

01

of six

WHAT WE DO

We plan, procure and manage projects from the first brief through to handover, keeping scope, cost and programme under control.

Key services and capabilities

- Project and programme management
- Design and build procurement (RFT/RFP)
- Engineer to the contract
- Budget, contract and variation management
- Professional team appointment and coordination
- Progress payment certification
- Funding applications and funder engagement for community projects

Typical project types

- New residential and commercial buildings
- Industrial and marine developments
- Education campus programmes
- Community and sporting facilities
- Civil and site works

RELEVANT PROJECTS

PROJECT	WHAT WE DID
Hobsonville Marine Industry precinct, est. \$300M	Redevelopment of the former Hobsonville Air Base into a superyacht and marine industry precinct, including 100,000m ² of industrial buildings and 15,000m ² of mixed-use office space. Procured the professional team.
UNITEC New Zealand 11-year facilities programme	Annual construction, refurbishment and relocation programmes on a live campus: 25-70 projects a year and 640+ staff relocations, completed on time and within budget.
West Auckland RDA Covered riding facility, ~\$5.3M	New covered arena, stables and civil works, including design and build procurement and engineer to the contract.

The value we bring

- Tight budget control, backed by contract and variation management
- Careful contractor procurement and oversight
- One accountable person across consultants, contractors, council and funders

What sets us apart

- Hands-on engineer to the contract experience
- Projects from \$120,000 refurbishments to a \$300M precinct
- PMI-aligned processes and a postgraduate qualification in project management
