

Landscape Architectural Design

Practical landscape design for built projects

06

of six

WHAT WE DO

Brett holds a Bachelor of Landscape Architecture and applies landscape design alongside our project work, from concept to construction. It is offered with our project management services, not as a standalone landscape practice.

Key services and capabilities

- Landscape concept design
- Park and garden design, residential and commercial
- External works and site planning
- Planting and soft landscape design
- Playground design and construction, including early childhood settings
- Playground upgrades and refurbishment
- Coordination of landscape works with construction

Typical project types

- Park design
- Garden design, residential and commercial
- Early childhood playgrounds
- Playground upgrades and refurbishment
- External works for development and refurbishment projects
- Community and sporting grounds

RELEVANT PROJECTS

PROJECT	WHAT WE DID
Preschool playground New playground, design and construction	Designed and delivered a new preschool playground, from concept through to construction.
West Auckland RDA Covered riding facility, ~\$5.3M	External works delivered alongside the arena and stables, including carpark, dry ponds, water jump and cross-country course.
Rangitoto College 10-year property plan, \$4.5M	Sportsfields, carpark and external works delivered as part of the school's 10-year plan.

The value we bring

- Landscape design that can be built and is coordinated with construction and consents
- One team for the building and its surrounds
- Practical advice on planting, play and site layout

What sets us apart

- Landscape design and project management in one service
- Playground design that considers play, planting, circulation and construction
- Direct experience delivering external works
